The President referred to the good of Locomotive Firemen.

The President spoke of the necessity of work. "I pity the creature who does not work," he said, "at which ever end of the social scale he may regard himself as being." He said the law of work well done secured the successful American life.

"A great deal can be accomplished," he said. "by working each for all and all tor each, but we must not forget that the first requisite in accomplishing that the first requisite in accomplishing that is that each man should go on and work for others by working for himself.

"I feel that organizations like yours have a tonic effect upon the whole body politic. It is a good thing that there whole be a large body of our fellow citizens who exercise the old qualities of courage, daring and resolute, unninching, willingness to meet danger at need and that there should be a profession whose members must year in and year out display these qualities.

"I hope to see all our people develop the softer, gentler virtues to an ever in creasing degree, but I hope never to see them lose the sterner virtues that make men.

Weather Conditions Cause Break

in Corn and Wheat. CHICAGO, Sept. 8.-Weakness ailed again to-day during the early hours of trading on the Board of Trade. Weather conditions had much to do with the breaks.

Wheat started a trifle firmer on ittle buying by one of the big houses. Dips followed on dry weather for the spring movement, weak cables and neavy world's shipments.

The corn belt had warm weather yesterday, cables were lower and traders in consequence turned bearish. Nearly all operators felt that with another week of warm weather a big corn crop will be assured. September weakened nervously on a little selling.

Fair weather and liberal receipts depressed oats early. Grading was still poor, but elevators were making stand-ard grade freely.

Hogs were received liberally at the stock yards and sold lower. This induced some selling of hog products in the pit and prices started off all around but rallied on a little support and held very steady.
